

## PARKING VALIDATION SOFTWARE

The easiest solution for fitness facilities to offer and manage complimentary customer parking. Customers can register their own plates in just 3 simple steps:

- 1 A **tablet** is located inside the facility
- 2 Parker enters their **license plate** number and clicks "**Park**"
- 3 Data sends to enforcement in real time

A flexible rules engine enables operators to limit individual plates to 1 registration per day, among other settings.
