

PARKING VALIDATION SOFTWARE

The easiest solution for businesses to validate and manage their client parking. Clients can register their own plates or an administrator can register guests in advance.

- 1 Scan **QR Code** with camera app or go to offstreet.io and enter location #10006
- 2 Enter **license plate** number and click "Park"
- 3 Data sends to enforcement in real time

A full audit trail allows businesses to track usage, extend/shorten client stays, and run reports.
